many happy returns of today

Thanks to our doctors, most Americans can look forward to longer and happier lives than ever before. Some of our deadliest diseases have already been conquered; others are fast being brought under control. Even with cancer, much progress has been made.

Today, more than 800,000 Americans are alive and well, cured of cancer . . . many of them, because they made a habit of having thorough health checkups every year no matter how *well* they felt . . . *many others, because they went to their doctors at the first sign of* any one of the seven danger signals that may mean cancer . . . *all* of them, because they went to their doctors *in time.*

To learn how to guard *yourself* against cancer, call the American Cancer Society office nearest you or write to "Cancer" in care of your local Post Office.
